Green Valley

With over 20 years of experience, 12 years ago we starting to make our brand, hundreds of satisfied clients and a constant drive of wanting to do things differently, while maintaining professionalism and keeping up to date with technology.

We are swimming pool builders and service specialists located in Sharjah and branch in Abu Dhabi.

As certified pool contractors, we offer beautiful pools, spas, Jacuzzi and waterfalls

Using superb craftsmanship and long-lasting equipment, backed by quality expertise.

The swimming pool means leisure and rest, an area for enjoying the water and sharing games, relaxation and exercise with family and friends.

There are outdoor and indoor swimming pools, large and small swimming pools, swimming pools designed in straight lines or curved, practical or with an edge on design.

There is an ideal swimming pool for every user and **Green Valley** works to make them all possible.

Green Valley main aim is to provide global solutions with value added for swimming pools to guarantee user comfort and safety and easy maintenance.

Green Valley has a wide commercial network, the widest possible product range, permanent investment in innovation and research and development and highly qualified staff.

The swimming pool is conceived as a self-sufficient closed circuit which, once full, needs hardly any additional water for it to work.

As a result **Green Valley** develops sustainable solutions that turn any swimming pool into an area that provides users with well-being at the same time as it takes care of the environment.

The saving of resources, such as water and energy, means savings for users and turns the idea of a swimming pool into a luxury that is within reach.

And all with the **Green Valley** guarantee, the reference brand in the swimming pool sector across the UAE.

Our Work

Our company specialized in the field of swimming pools and its accessories. We build swimming pools made of reinforced concrete and in all sizes and types and designs .

Characterized the experience and accuracy in execution, and relied on the best materials and the highest levels of operational experience.

A full team of administrators and executives and professionals qualified to make your ideas and your dreams a tangible reality

Defined by and proud of our precedent to the largest construction companies and engineering offices and customers in United Arab Emirates

More proof of our success is our attachment to many of the clients in a number of projects over a long time

We have developed from the beginning always at the forefront, we hired the best expertise and the finest raw materials to ensure quality product Adopted in the company's operational strategy to select the best materials, and selection of partners for the successful adoption of them accurately, such as suppliers and agents.

Success Partners

CEMEX READY MIX

CEMEX does not “simply manufacture concrete”, but develops solutions based on the thorough knowledge and application of concrete technology. Leveraging years of experience, a worldwide pool of knowledge, and state-of-the-art expertise about the different concrete constituents and their interaction, CEMEX offers its customers “concrete by design—tailor-designed concrete.

FOSROC

Fosroc prides itself on our values - values that reflect the way our people work, think and act, that are ultimately part of the Constructive Solution for our customers.

The values to which we aspire include;

Fosroc believes safety is paramount with respect to Fosroc’s products and our interactions with customers. Fosroc delivers on our promises to customers and delights in exceeding their expectations.

Fosroc works closely with our customers from many diverse geographical, cultural & political backgrounds.

Fosroc is motivated by our mutual interest in the global construction market and respects different backgrounds and beliefs.

AQUA POOL

Born in 1974 with water treatment component moulding, **Aqua S.p.A.** always kept an inner politic very careful to customer's needs, always looking at European and International scenario. Starting from a little family business, today Aqua S.p.A. in its San Martino in Rio Headquarters counts an area of 7000 square meters in buildings, 4000 hosting production departments and 3000 for goods moving and stocking. 4000 more are under construction to host new departments.

Two factors distinguished the work of the society in recent years, a strong attention to changing markets and a company policy aimed at the development of commercial structures in areas considered strategic for logistical and market potential.

GREEN VALLEY

Very important has been the experience in identifying, acquiring and integrating complementary businesses with their own, which enabled the Group to achieve significant synergies by consolidating its market leadership.

Today the group Aqua is an international reality that owes its strength and its success to the work and commitment of many people.

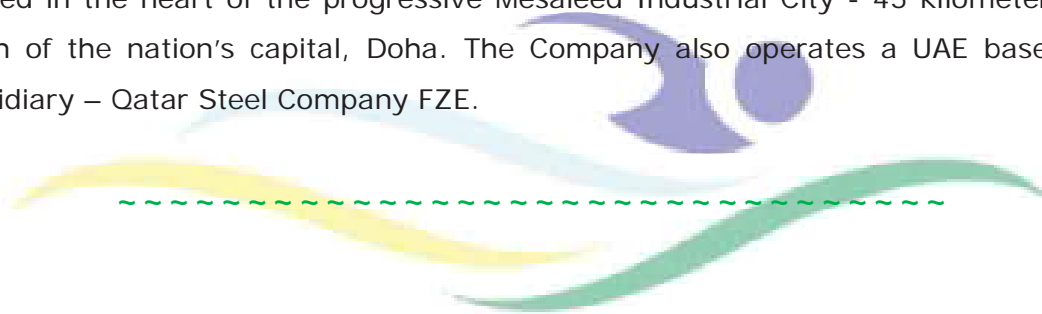

QATAR STEEL

QATAR STEEL Company was formed in 1974 as the first integrated steel plant in the Arabian Gulf. Commercial production commenced in 1978 with the company becoming wholly owned by Industries Qatar in 2003.

Today, Qatar Steel is widely recognized as a foremost leader in the steel industry, extending its pioneering commitment from an expansive mill site located in the heart of the progressive Mesaieed Industrial City - 45 kilometers south of the nation's capital, Doha. The Company also operates a UAE based subsidiary – Qatar Steel Company FZE.

ASTRAL POOL

With more than 40 years' experience in the marketplace, **AstralPool** is a member of the Fluidra Group, a multinational Spanish group that has over 40 years' experience specialising in the development of sustainable applications for the storage, handling, treatment and use of water.

Every year over 20,000 professionals and 200,000 swimming pools use some of the 15,000 components manufactured by AstralPool. Beyond their functionality, AstralPool's products and solutions provide a sustainable response to users' needs, allowing them to save water and preserve the environment while enjoying their swimming pools.

COSMOPLAST

Cosmoplast, a primary member of Group Harwal, has been at the forefront of the plastic industry in the Gulf region since 1976. Since inception, Cosmoplast has been maintaining its leadership position in the region through the company's unwavering emphasis on quality, product innovation and customer focus. The company based in Sharjah, UAE has its operations divided into Pipeline Systems and Molded Items and Disposable products divisions, which cater to industrial and consumer goods segments respectively.

Under the Pipeline Systems, Cosmoplast manufactures pipes and fittings in sizes ranging from 12 mm up to 2000mm in diameter and caters to an extensive range of market segments and applications covering infrastructure development, plumbing, oil & gas, district cooling, irrigation, landscaping and water extraction. Specialized systems such as pre-insulated pipes, reinforced thermoplastic pipes, specialized plumbing systems and fabricated uPVC and GRP manhole systems are also manufactured by the company. Cosmoplast Pipeline System Division is an ISO 9001:2008 certified unit and assures conformance to many international manufacturing standards including

NATIONAL PLASTIC

National Plastic was founded in 195 by Dr. Antoun Kronfi who had an extraordinary vision to create a global company that could manufacture and supply the highest quality thermoplastic piping product to the international market. The company was established with a philosophy to employ the latest technology and equipment to manufacture a quality range of piping systems. It has continually evolved to be a major supplier to projects and customers around the world.

Using all of these ingredients, we proudly built concrete swimming pools

Pool Construction

- **Peg out and approve position of swimming pool**

At this stage is to identify the site

Determining the levels of drilling

Draw the initial shape of the swimming pool

Get client approval dig up the site and adjust the soil

GREEN VALLEY

- **Blinding**

After making good compaction for the ground

Of swimming pool we should Lay 1000g Polythene

Sheet and 10 cm thick blinding

- **Block Works**

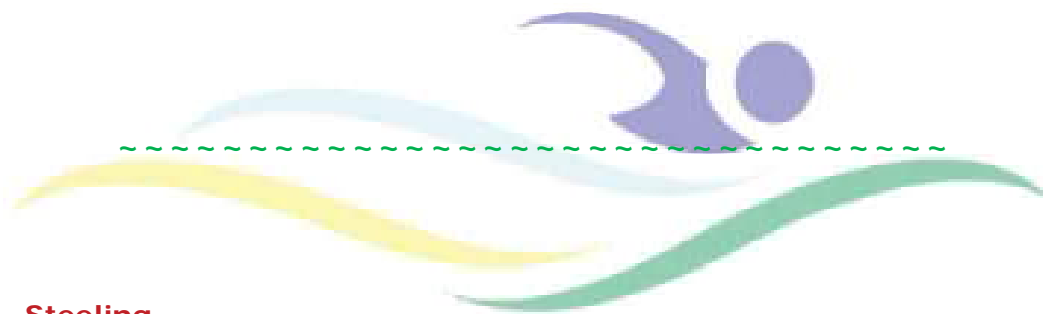

Swimming pool should be built by hollow block 8 inches size

Block makes the process of formation of the body

Such as the swimming pool design preset

Supply and apply 2 coats of cold poly coat bitumen

from **HENKEL POLYBIT GERMANY** to external faces.

- **Steeling**

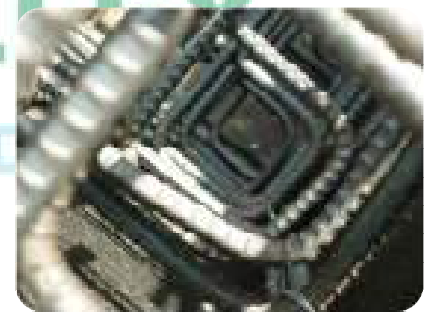

Provide and install the steel for the wall & floor

Of the pool 2 layer as drawings defined by the best

Methods used in the work of reinforcing and which

Will ensure a better distribution of the internal pressure

Of the water on the sides and floor of the swimming pool

- **Reinforced Gunitite**

Construct reinforced gunitite or concrete 200 mm

thick as per drawings to wall using a 1:4 mix

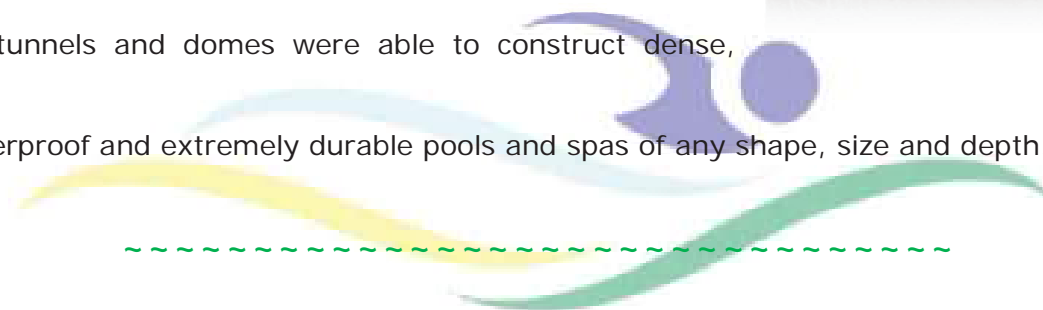

(1 part by weight of cement and 4 parts by weight of

3/16 crushed aggregate) Today, using shotcrete

(Shooting concrete), the same technology that is used

for tunnels and domes were able to construct dense,

waterproof and extremely durable pools and spas of any shape, size and depth.

- **Plaster and Coping Stone**

Apply 20 – mm plaster to the interior surface of the pool

to line and level using cement / sand with waterproofing

bonding agent. We have developed the top edge of the

pool to become of the granite or natural marble with a

coarse texture

- **Waterproofing**

Apply waterproofing (cementation) to the inner side of the pool Germany high-quality and specifications materials, is a mixture of powder and liquid Mix well and is used like a paint 3 layers of the interior surfaces of the swimming pool

- **Tiling**

Supply and fix mosaic tile to the floor & wall of the pool in waterproof adhesive and grout

All chemicals used with the same brand to ensure compatibility

- **Finishing**

After fixing pump room equipments and clean the pool

Instead of completion the project and fill up the pool

With clean fresh water

As a result, all our pools come with 1 – year warranties on electromechanical items such as filters, pumps & lights, 3 – years warranties on the internal tiling, and 10 years for the concrete structure.

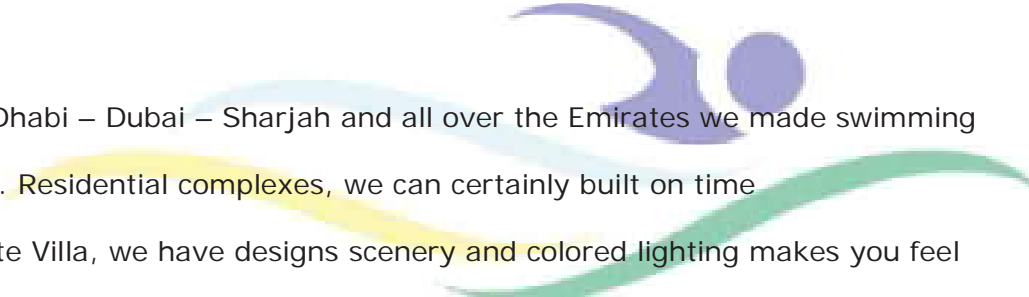

Successfully for over 20 years to acquire the confidence of hundreds of customers we acquired their confidence in choosing our company, and left a satisfaction smile at the end of each project

We carried out more than a project for our customers and the long period of time

We deal with major construction companies and engineering consultants and VIPs

Abu Dhabi – Dubai – Sharjah and all over the Emirates we made swimming pools. Residential complexes, we can certainly built on time

Private Villa, we have designs scenery and colored lighting makes you feel relaxed

GREEN VALLEY

A large swimming pool inside the club or school or government trivial, we can build completely by design

SWIMMING POOLS

We believe in the post-construction service department that the customer is the most important marketing tool for that care about preserving our achievements

In 2013 almost 75% of the projects was inspired or former customers to new customers

[This to view some of our different type of projects](#)
